

Interstate Products, Inc. assists relief efforts sponsored by Mennonite Central Committee in Somalia

The Problem:

Find a way to provide a drinking water source for hundreds of people at a remote location that can be easily transported, setup and maintained.

The Solution:

2 Each Interstate Products, Inc. custom 5,000 gallon potable water pillow tanks with 2" input & discharge, 4 garden hose bibs & discharges with vent.

December, 2007 - Interstate Products, Inc. demonstrates its ongoing commitment to support global relief efforts by providing potable drinking water to displaced villagers in Somalia. According to David Martin of the Mennonite Central Committee, "Somalia is in a real crisis with a huge amount of human displacement due to ongoing warfare. These water bladder tanks are now fully operational and being put to good use. Thanks to your great product, along with Somali ingenuity in building the sand bag platforms, we are providing clean drinking water to hundreds of people daily."
